ABC INSTITUTE OF TECHNOLOGY (SAMPLE)

Attendance Rules and Calculation

IMPORTANT NOTICE: This document contains fictional sample information for educational and RAG chatbot testing purposes. It is not an official policy or record of any real institution. Verify all real-world details with the relevant college or authority.

1. Sample attendance requirement

For this sample knowledge base, the illustrative minimum attendance requirement is **75%**. Students should attend classes, practical sessions and other academic activities regularly. This percentage is included only to test chatbot retrieval and must not be treated as an actual college or university rule.

2. Attendance calculation

Attendance percentage = (Number of classes attended ÷ Total conducted classes) × 100

Example: Total conducted classes = 100. Classes attended = 85. Attendance percentage = (85 ÷ 100) × 100 = 85%. Therefore, the sample student's attendance is 85%.

3. Attendance monitoring

• Attendance is recorded by faculty members in this sample scenario.

• Students can check attendance through a sample student portal.

• Department coordinators review attendance records.

• Students should contact their department if attendance records contain errors.

4. Medical leave

Students requesting medical leave may be asked to submit supporting medical documents according to the applicable college rules. The process, approvals and impact on attendance must be confirmed with the actual institution.

5. Important policy note

Actual minimum attendance, condonation, medical leave and examination eligibility rules must be checked against the current regulations of the relevant university and institution. The chatbot must not present this sample percentage as official policy.
